

CURV-O-MARK Flange Aligner Base (J1903)

35170380

Remove the difficulty of flange aligning and squaring with a simple tool that holds a square in the needed position without tying up one's hands. The Curv-O-Mark Aligner Base is notched at either end for ease in aligning on the centerline of the pipe and has two 25-pound pull, cast-in magnets for holding either a flat horizontal or vertical position. The Base will accept either leg of a standard or combination square and will work on pipe diameters from 1 in. on up, requiring only the extension of the legs of the square being used to accommodate larger diameters. The Flange Aligner Base is made from lightweight, durable aluminum.
